Air Source® RESPONDER RIT SYSTEMS *High Pressure Series*

PRODUCT DESCRIPTION

- ✓ The Air Source® Responder High Pressure Series is a comprehensive system designed to provide additional high-pressure air to trapped or downed firefighters through their NFPA connection on their SCBA.
- ✓ The system is available as a “standard” configuration, or as a “deluxe” system that is designed by the purchaser.
- ✓ The unit will hold any high pressure 60 minute duration SCBA cylinder
- ✓ All systems have a heavy-duty nylon carrying handle that is sewn through the bag.
- ✓ All systems have a nylon webbing “superstructure” that removes all stress or strain from the bag.
- ✓ Large pockets for storage of ancillary rescue equipment.

APPLICATIONS

- Rapid Intervention Teams, Emergency Response Rescue Teams, F.A.S.T. Teams, wherever the potential exist for an immediate emergency response to downed or fallen firefighters or rescuers wearing SCBA.
- Large storage pockets provide a means of storing rescue equipment and other items such as spare masks, etc.
- System provides for future department upgrades.
- Available with auxiliary high-pressure inlets for longer durations.
- A “Deluxe” system permits the owner to design the type storage pockets and other accessories.
- Truly a “custom” system.

CONSTRUCTION & SPECIFICATIONS

- ✓ Heavy-duty fire resistant nylon bag and pockets. Easy to decontaminate and clean.
- ✓ Nylon webbing interior “superstructure” prevents stress and strains on outer bag.
- ✓ Protective steel cage protects all vital components.
- ✓ Heavy Duty hardware with an integral carrying handle.

OPTIONAL FEATURES

- Shoulder strap
- High-pressure auxiliary inlets and outlets for longer durations or daisy chaining units.
- Various lengths of high-pressure attachment lines.
