## Introducing the all new Air Source® J.A.R. systems (JUST-A-RIT)

### Product Description

Our J.A.R. (Just-A-RIT) line of equipment has been designed and marketed as an economical means of providing an emergency air source for direct connection to the NFPA RIT quick disconnect plug on the newer Self Contained Breathing Apparatus that are N.F.P.A. Pamphlet 1981-2002 compliant. The systems is being made available as just the carrying bag, or with high pressure hose and RIT connectors(sockets) and dust plugs in lengths of 5 ft., 6 ft., 8 ft., 10 ft., 15 ft., 20 ft., and 25 ft., as well as any custom length the customer requires.

The J.A.R. systems are a very cost efficient means of providing an additional layer of safety to fire rescue operations. With prices this low, every ladder truck, engine, and rescue truck should be equipped with one. The Heavy duty red nylon carrying bag is equipped with large 5" by 6" X 19.5" long pocket to hold the high pressure hose securely when the system is stored on the apparatus. This pouch features a Velcro closure flap to keep the coiled hose protected while in storage. The system also has an adjustable shoulder strap to facilitate hands free deployment of the unit.

### Product Specifications
